US/Israel strikes Iran by...?	20% (Feb 28), 64% (March 31)	\$16M	

Today, prediction markets are used to evaluate political and sports events, product launches, and even tech releases.

At their core, they are a decentralized way to aggregate information: the contract price reflects the probability of an event.

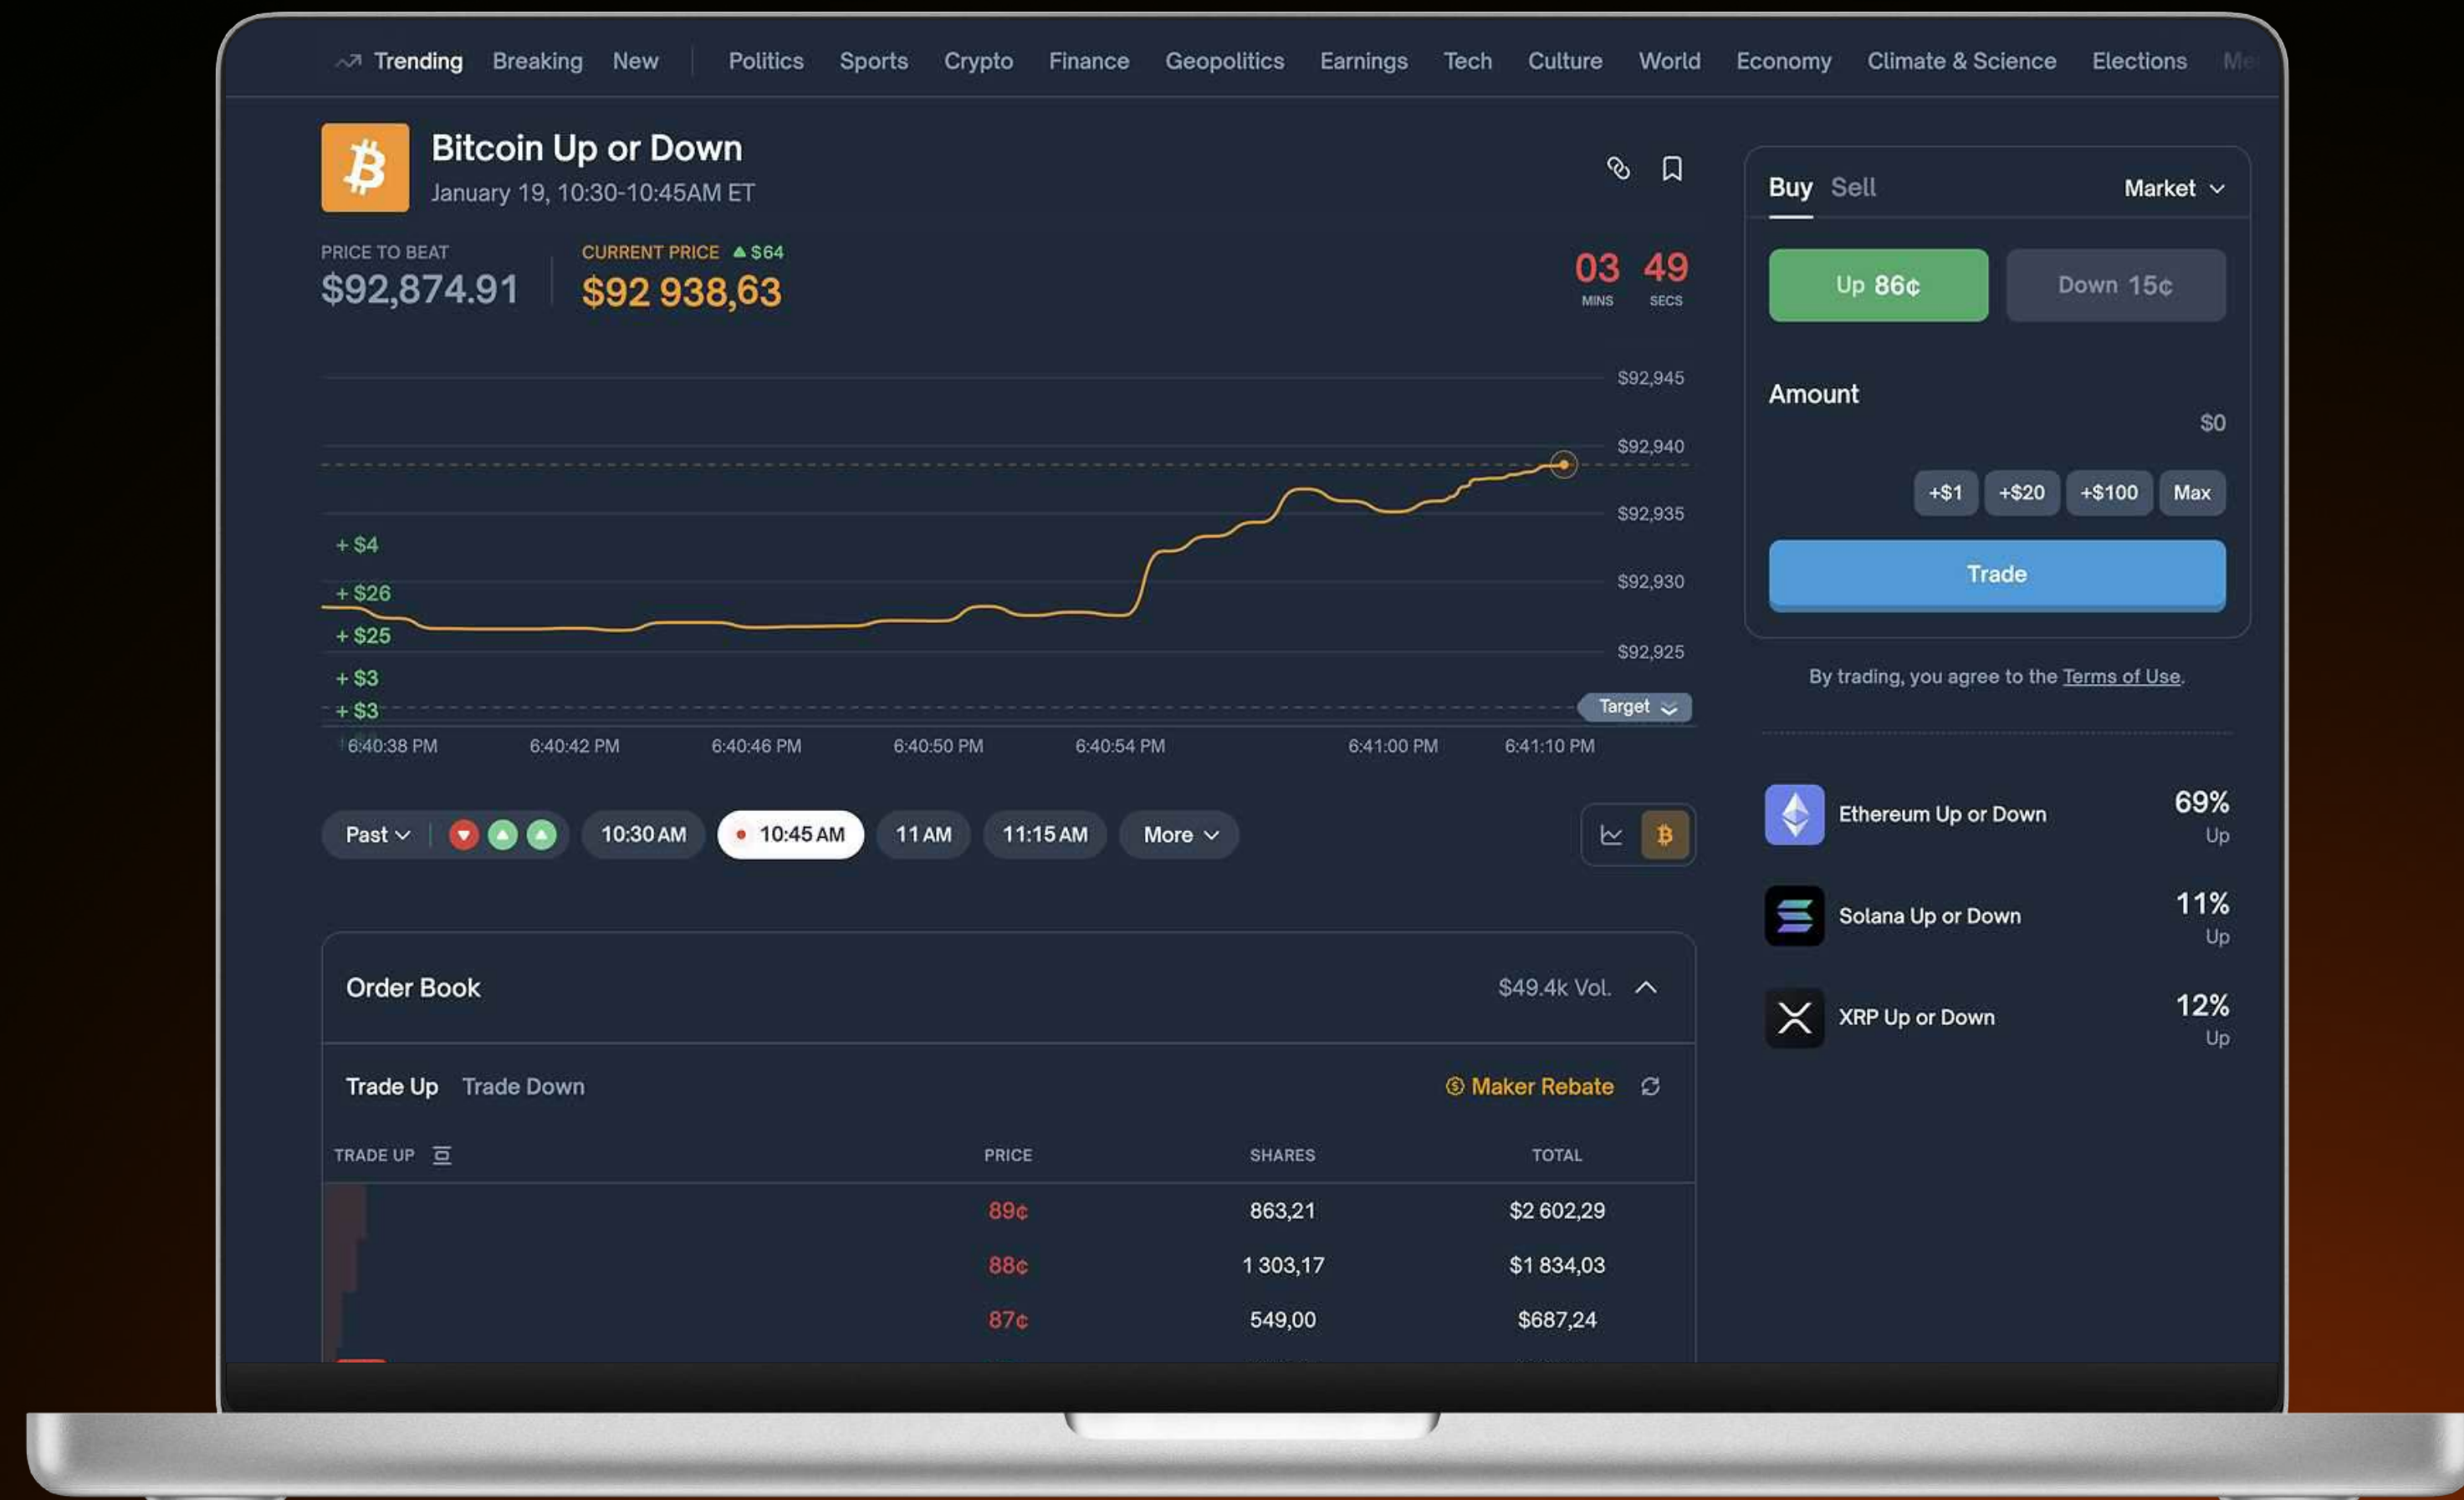

FINANCE MARKETS

Prediction markets are not just about debates over the Super Bowl final or the next U.S. president.

The crypto section on Polymarket attracts thousands of users daily.

Millions of dollars are spent daily on predicting if BTC price will be higher in 5 minutes.

ONLINE CASINOS - THE PROBLEM

- ✗ Traditional slots and betting formats are getting outdated.
- ✗ Game providers offer repetitive, similar content.
- ✗ Users demand fast, dynamic games with instant cashout options.

PREDICTION MARKET AS A WHITE-LABEL SOLUTION

Increase user retention and engagement on your platform by integrating prediction games into your iGaming ecosystem (API / iframe), inspired by Polymarket mechanics and aligned with modern user expectations.

We offer two proven game formats powered by the same mechanics that made Polymarket a unicorn.

OUR PRODUCT

1. CUSTOM EVENTS

Binary outcome events: “Yes / No”, from politics to cultural trends.

Operators can create markets around any event, unlocking unlimited possibilities for players and the platform.

Results are managed via an admin panel.

2. CRYPTO MARKETS

5- and 15-minute prediction rounds on the price direction of volatile crypto assets such as BTC, ETH, and others.

Players predict whether the price will go up or down.

SIMPLE INTEGRATION & SUPPORT

FRONTEND

Embedded widget or full API integration

BACKEND

Works with operator's accounts, no interaction with the 1gaGaming backend

ADMIN PANEL

Market creation, management, and real-time monitoring

BUSINESS MODEL

REVENUE MODEL

Platform operates on a fixed commission per transaction. Operator can set their own commission level.

Recommended rates:

- 2% on buy
- 5% on sale

PARTNERSHIP MODEL

Option A (Fixed+Revenue Share)

- Fixed monthly fee
- Percentage of profit

Option B (Revenue Share)

- Percentage of profit

KEY ADVANTAGES

- **Simple Business Model**

Customizable commission on all user positions

- **Risk-Free Architecture**

The operator does not risk their own funds due to the mathematical market model

- **Easy Integration**

Full documentation, API, and technical support provided

- **Onboarding Bonus**

FREE integration for the first month or until reaching 1,000 unique players
